PROFESSIONAL SUMMARY

Java developer with 4+ years of experience building and maintaining web applications. Proficient in Spring Boot, Java EE, Hibernate and AWS. Proven ability to work independently and as part of a team. Beyond backend development, I possess proficiency in Bootstrap for responsive UI's, Thymeleaf for server-side templating, and a foundational understanding of Angular for potential future frontend development.

SKILLS

- **Programming Languages:** Java (advanced), Python (proficient), JS (intermediate).
- **Back-End Frameworks:** Spring Boot (proficient), Spring (intermediate), Java EE (intermediate), Node.js (intermediate), Flask (beginner).
- **Object Relational Mapping (ORM):** JPA/Hibernate (proficient).
- **Testing:** Junit (beginner), Mockito (beginner).
- **Databases:** MySQL (advanced), MS SQL (proficient), PostgreSQL (intermediate), MongoDB (intermediate), Oracle DB (beginner).
- **Cloud:** AWS (proficient), IBM Cloud (intermediate)
- **Front-End Frameworks:** Bootstrap (advanced), Thymeleaf (proficient), Angular (beginner).

WORK EXPERIENCE

Deloitte Consulting Group, México   October 2023 – Current
Back-End java developer

• Leverage Java and related technologies (spring boot, hibernate, microservices) to develop and maintain high-impact software solutions for Deloitte clients.

• Collaborating with cross-functional teams to deliver high-impact software solutions that support Deloitte's clients in achieving their business objectives.

TATA CONSULTANCY SERVICES (TCS), México   May, 2021 – October, 2023
Back-End java developer (2 years)

• Designed and developed high-performance, secure, and maintainable software applications using Java.

• Collaborated with cross-functional teams (designers, product managers) from different countries and time zones to gather requirements and deliver solutions leveraging Agile methodologies for on-time, on-budget project completion.

VZERT, México   July, 2018 – October, 2018

Front-End developer (3 months)

• Built the startup's landing page using HTML5, CSS3, and JavaScript, ensuring a user-friendly and visually appealing front-end experience.

• Developed dynamic client dashboards leveraging:
- MySQL for efficient data retrieval.
- JavaScript libraries like Chart.js for interactive data visualization.
- Data analysis skills to identify trends and present insights from user payment references.

Banco del Bajío, México   June, 2017 – December, 2017
Back-End java Developer (internship 6 months)

• **Website migration:** Collaborated on migrating Banco del Bajío's entire website using an Oracle GUI tool, ensuring efficient data transfer.

• **Data reporting and management:**
- Developed dynamic reports and generated CFDI receipts (Digital Tax Receipts) for clients using SQL queries in Oracle RDBMS.
- Utilized Jasper Reports within a Java module for automated, periodic report generation.

• **Version control:** Implemented Apache Subversion for effective code versioning.

EDUCATION

Tecnológico Nacional de México / ITLeón   **2018**
Bachelor's Degree in Computer Systems Engineering

Tecnológico Nacional de México / ITLeón   **2021**
Master's degree in Computer Science

ADDITIONAL INFORMATION

- **Communication:** Fluent in English, ensuring seamless collaboration with international clients and colleagues.
- **Research & Innovation:** Awarded "Best Long Paper" at IE2020 for a research project in sentiment analysis and machine learning, demonstrating an aptitude for applied research.
- **Personal Development:** Proactive in personal skill development, showcased by building personal projects using frameworks like Angular and Spring Boot.
- **Community:** Dedicated to fostering the programming community through volunteer work as a mentor for a local coding bootcamp for kids.
- **Development Methodology:** Familiar with Agile methodologies, allowing me to thrive in fast-paced and collaborative development environments.
- **Version Control:** Proficient in Git version control system, including both Git terminal and Github workflows.
